

Tactiles are a range of paving plates with distinctive, raised surface profiles designed to be detectable by both sighted and visually impaired pedestrians.

Tactile paving can be used to convey important information about the environment, for example hazard warnings, directional guidance, or the presence of an amenity.

Research has shown that visually impaired pedestrians can reliably detect, identify and remember a limited number of different tactile paving surfaces and the meanings assigned to them.

Made from tough, hard wearing, durable GRP with a gritted surface giving excellent slip resistancy that will last for years.

Our 10 Year Manufacturer's Guarantee:

Should any manufacturing defects occur within 10 years of purchase, we will replace free of charge.

Our product features:

- Rated extremely low potential for slip.
- 10 year guarantee.
- Easy to install.
- Tough, hard wearing and durable GRP - lasts for years.
- Weather resistant.
- Corrosion resistant.
- Impact resistant.
- Light weight.
- Non metallic.
- No groundwork required.
- Minimal downtime.
- Internal or external use.

Benefits:

- Helps create a safer environment.
- Can be applied to nearly any substrate.

Compliance:

- DDA Compliant.
- Building Regulation Compliant.
